Behavior Genetics, Vol. 25, No. 6, 1995

Subject Index for Volume 25

ADHD, twin study, 274, 285
Academic achievement, cognitive ability, adoption study, 1
Achievement, twin study, 295
Adolescent
  adjustment, parenting, 281
  behavior, twin study, 262, 263
  substance abuse, family study, 294
Adoption studies
  cognitive ability, academic achievement, 1
  experimentation with illicit substances, 260
  humor, 277
  sex limitation, reading performance, 17
  specific cognitive abilities, 259
  speech disorders, 264
  substance abuse, 293
  TV viewing, 284
Affective illness, twin study, 217
Aggression
  measurement, 279
  mice, 298, 357, 361, 367, 475
  twin study, 256, 288
Alcohol
  ADH2, ADH3 loci, 278
  consumption, twin study, 274, 284
  consumption, Oriental flushing response, 59
  assortative mating, twin study, 290
  dependence, latent class analysis, family study, 257
  mice, 258, 264
  personality, twin-family study, 257
  preference, rats, 282
  substance abuse, MAO, 292
  twin study, 270, 291, 293
Alzheimer's disease
  Down's syndrome, chromosome 21, 301
  handwriting, 282
  nicotinic receptors, 149
Antisocial behavior
  sex differences, 286
  twin study, 261
Anxiety
  depression, twin study, 33, 263
  mice, 287, 557
Anxiogenic response, mice, 278
Assortative mating
  alcohol, twin study, 290
  cognition, twin study, 284
Attack latency, mice, 288
Autism, single genes, 299
Avoidance learning, rats, 267, 371

Behavior
  brain, 299
  inhibition, twin study, 286
  mutations, mice, 569
Birth
  rate, twins, 337
  stress, handedness, 517
Body mass index, twin study, 270
Brain
  behavior, 299
  potentials, twin study, 281, 285, 292

CBC, Achenbach, rater bias, twin study, 287
C. elegans, QTL, life history traits, 300
Chorion type, cognition, twin study, 457
Chromosome 21, Alzheimer's disease, Down's syndrome, 301
Circadian rhythms
  mole rat, 239
  nest building, mice, 257
Cocaine, mice, 277, 287
Cognition
  assortative mating, twin study, 284
  cognitive ability, academic achievement, adoption study, 1
  information processing, twin study, 277
  memory, twin study, 272
  mental rotations test, sex differences, 278
  specific cognitive abilities, adoption study, twin study, 259
  twin study, 199, 264, 267, 283, 285, 290, 421, 457
Conduct disorder, twin study, 288, 291
Communicative genes theory, 267
Congenic mice, taste sensitivity, 233
Courtship, Drosophila, 268

Data bases, twin studies, 276
D2 dopamine receptor, spatial performance, 45
Delinquency, psychophysiology, twin study, 254
Depression, twin study, 33, 265, 267
Development, mice, 300
Disruptive behavior disorder, comorbidity, 293
Disruptive child behavior, twin study, 311

Emotional reactivity, twin study, 258
Environmental
  influences, twin study, 253, 269
  effects, development, 283
Equal environment assumption, twin study, 327
Ethnocentrism, 261
Externalizing disorders, latent class analysis, twin study, 288
Eyeblink response, conditioned, twin study, 279

Family studies
  alcohol dependence, latent class analysis, 257
  drug abuse, 255, 258, 289, 294
  dyslexia, 269
  panic–phobia, 499
  somatization, 499
Female sexual orientation, 407
Food consumption, twin study, 292
Foraging behavior, Drosophila, 300

Group differences, 275, 286

Handedness, 433, 447, 517, 525
  twin study, 262, 281, 282
Handwriting, Alzheimer's disease, 282
Hippocampus, mice, 261, 268, 275, 297
Humor, adoption study, 277
Hyperthermia, rats, 282
Hypothalamus, 290

Individual differences
  nicotine response, 109
  nicotine sensitivity, 161
Individual and group differences, 272
Isonomy, 269

Ladybirds, mating, 467
Latent class analysis, externalizing disorders, twin study, 288
Laterality, mice, 276
Lead toxicity, mice, 290
Leadership, twin study, 280
Learning
  mutants, mice, 299
  disability, QTL analysis, 253
Life
  events, twin study, 274, 286
  span, new methods, 294
Linkage studies, non-replication, 273
Locomotor activity, Drosophila, 81

MAO, alcohol, substance abuse, 292
MMPI, QTL, 283
Mammalian Y chromosome, 278
Maximum likelihood approximations, twin study, 211
Mental rotations test, sex differences, 278
Methodology
  affected relative, 268
  aggression measurement, 279
  comorbidity, 281
  latent class analysis, alcohol dependence, 257
  maximum likelihood approximations, twin study, 211
  multipoint interval mapping, QTL, 259
  QTL, multivariate methods, 256
  sex linkage, biometrical model, 279
  structural modeling, confidence intervals, 279
Microphthalmic mice, 253
Mice
  aggression, 298, 357, 361, 367, 475
  anxiety, 287, 557
  anxiogenic response, 278
  attack latency, 288
  behavior, mutations, 569
  benzodiazepines, 265
  C57BL substrains, 271
  circadian rhythms, 257, 545
  cocaine, 277, 287
  congenic, taste sensitivity, 233
  development, 300
  drug sensitivity, 297
  EEG, 291

ethanol, 258, 264
hippocampus, 261, 268, 275, 297
hypothalamus, 290
knockout, 275, 283
laterality, 276
lead toxicity, 290
learning, mutants, 299
microphthalmic, 253
mitochondrial DNA, behavior, 286
morphine, 397
morphine induced analgesia, hypothermia, QTL, 254
motor learning, 266
mutations, behavior, 569
nerve growth factor, 258
nest building, 247, 257
nicotine effects, 179, 187
Penn State RI QTL Cooperative Data Registry, 256
pup retrieval, 75
QTL, 261, 265, 269
QTL, RI strains, 260, 291, 298, 489, 545
RI strains, 260, 269, 291, 298, 301, 557
seizures, QTL, 265, 269
sex determination, 255
seratonin, QTL, 261
sleep time, 67, 260
spatial learning, 273
stress, QTL, RI strains, 489
synaptic plasticity, 298
taste sensitivity, 233, 257
transgenic, APP, 280
Y chromosome, 268, 271
Mitochondrial DNA, behavior, mice, 286
Morphine, mice, 397
Morphine induced analgesia, hypothermia, QTL, mice, 254
Mother–infant interactions, twin study, 255, 274
Mother–sibling interaction, twin study, 261
Motor activity, paradise fish, 385
Motor learning, mice, 266
Mutations, behavior, mice, 569

Nerve growth factor, mice, 258
Nerve conduction velocity, twins study, 341
Nest building, mice, 247, 257
Neuropsychiatric genetics, 255
Nicotine
dependence, comorbidity with smoking, 95
EEG, 273
individual differences, sensitivity, 161
mice, rats, 179, 187
